EDUCATION

College of Engineering Thalassery

Btech-Electronics and Communication
2017-2021

SKILLS

- Javascript
- Front-end developing(Html/Css)
- React-Native
- React JS
- iOS/Android developing
- Polymer JS

LANGUAGE

English

Hindi

ABOUT ME

Front-End Developer with 5+ years of experience at Infosys delivering enterprise banking web and mobile applications. Strong expertise in JavaScript, React Native, React.js concepts, HTML, CSS, REST API integration, iOS/Android development, and release management. Experienced in building responsive user interfaces, debugging production issues, and collaborating across teams.

EXPERIENCE

Technology Analyst

2026 January-present

Infosys

North American Bank Product- React Native Product (Locofy + Native Integrations)

- I worked on a product built from Figma designs and Locofy AI-generated React Native code. I integrated major native modules
- including Biometric Authentication, Microsoft MSAL, VPN detection, and iOS Push Notifications. I connected backend APIs and polished the UI to match Figma designs accurately.

2021-2025 Dec

Senior Systems Engineer

Infosys

- I work on a banking application built using React JS and WebView architecture. I develop features, debug issues, fix defects, and ensure stable releases. I handle mobile build processes, generating both APK and IPA for deployment.
- Developed and maintained enterprise-scale banking web applications using component-based front-end architecture.Built reusable UI components, implemented customer-facing features, and resolved production defects.Integrated REST APIs and collaborated closely with backend teams to deliver end-to-end functionality.Worked extensively with JavaScript, HTML5, CSS3, responsive designprinciples,and browser compatibility requirements.Participated in code reviews, debugging, testing, release management, and production support activities.Generated and managed Android APK and iOS IPA builds using Android Studio and Xcode.Worked extensively with Git and Jira throughout the software development lifecycle.Contributed to React Native applications with BiometricAuthentication, MSAL,i VPN Detection, Push Notifications, and API integrations.
Improved application stability, performance, and user experience for banking customers.
